

LOADING DOCK SOLUTIONS

Loading Dock Solutions. Every Day. GUARANTEED.

ProLift is dedicated to helping keep your employees and products safe.

Ask for your complimentary, on-site dock equipment evaluation of:

- Loading dock equipment
- Dock plates
- Vehicle restraints
- Dock levelers
- Dock doors
- Dock seals & shelters
- Dock bumpers

A well-executed planned maintenance program can extend the life of your dock equipment, making it safe and reliable!

Maintenance of loading dock equipment is often overlooked, but exposure to rain, snow, trash and dirt can cause equipment to malfunction. If a

dock leveler, door or trailer restraint fails, your company is at risk for operator injury and further equipment damage. To avoid a serious accident, it is important to routinely inspect, clean and service loading dock equipment. Our team of trained technicians can help keep your dock equipment operating efficiently and safely.

A Planned Maintenance program from ProLift includes:

- Complete loading dock equipment and door safety inspections
- Thorough cleaning of loading dock equipment
- Adjustments to reach optimum productivity for loading dock equipment and doors
- Lubrication as specified by the manufacturer
- Written evaluation of inspection

Need Advice?

Let ProLift evaluate your dock equipment needs by providing a complimentary safety and application survey. ProLift can recommend the frequency of maintenance as well as a plan to fit your budget.

We're committed to creating an ecstatic customer experience. Contact your local ProLift dealership today!
