

FLEET MANAGEMENT SOLUTIONS

Fleet Management Solutions. Every Day. GUARANTEED.

Core Reports are included with the Fleet Management Program to help you answer questions about your industrial assets and make informed decisions. Frequency of the report will vary by topic.

Monthly

- Planned Maintenance (PM) Due
- Contract Expiration
- Expense History
- Asset Listings

Quarterly

- Utilization Expense Summary
- Goals
- Operations Review

Annually

- Four "R's" Analysis –
Replace, Relocate, Retain
& Retire

Optimize your industrial assets with a Fleet Management program.

Our service begins with an in-depth review of your operations and assets. We will visit your plants and collect extensive information on your assets – makes, models, specs, age, leases, maintenance agreements, warranties, and more – even digital pictures. Then we'll record how you use your assets and contain the details in our online database.

Why Invest In Fleet Management?

Save Time & Focus on Your Business

The tracking and analysis of your industrial assets are managed by an unbiased, independent third party. Having only to search one database for details, you will have instant access to the information.

Our Analysis Will Save You Money

Regular review of the assets will uncover opportunities to cut costs and improve productivity. Our analysis will show how your equipment maintenance cost compares to others in your industry. Your equipment will also be on schedule to receive planned maintenance to keep downtime and major repairs at a minimum.

Easy & Cost Effective to Implement

As we survey your assets and gather the initial data, we will respect your plant and people by not adding to the work process. You have only minimal upfront investments and no extended term commitments. Our services scale with you as your fleet increases or decreases.

We're committed to creating an ecstatic customer experience. Contact ProLift today!
