

SAFETY TRAINING SOLUTIONS

Safety Training Solutions. Every Day. **GUARANTEED.**

ProLift offers a variety of training materials to enhance your classroom training and keep your operators and facility safe. Choose from:

- Forklift trainer presentation
- Training kits covering counterbalance, narrow aisle, pallet truck and aerial lifts
- Pedestrian safety video
- Operator wallet cards
- Daily checklist log
- Lock-out box
- Battery spill kits
- Eye wash stations
- Safety signs and stickers
- And much more!

FORKLIFT TRAINING

This course will provide classroom instruction on forklift safety principles. Operators will review top causes of forklift accidents, stability principles, daily inspection standards and fueling procedures.

Special emphasis will be placed on your unique lift equipment and workplace-related issues. Each class participant will take a written test and hands-on instruction is provided for up to 3 types of equipment operated at your facility.

Conducted at your site:

\$750 per class
Includes up to 15 students

Course length: Approximately 3 hours + hands-on evaluation

Or attend one of our ProLift site courses:

\$80.00 per student

Prefer Forklift Train-The-Trainer?

In addition to learning forklift safety principles, your trainer will review OSHA regulations, classroom preparation and procedures for performing a hands-on evaluation.

Conducted at your site:

\$950 first student
Includes choice of training kit, die cast forklift replica and trainer manual

\$300 each additional student
Includes die cast forklift replica and trainer manual

Course length: Approximately 8 hours

Or attend one of our ProLift site courses:

\$750 first student, \$300 each additional student

AERIAL & SCISSOR LIFT TRAINING

This course is designed to ensure your operators are trained in the safe method of operating an aerial or scissor lift. Each operator will review factors affecting lift stability, operator responsibilities and the proper fit of personal protection equipment (PPE).

Class participants will take a written test and are required to bring appropriate PPE. Hands-on instruction for up to 2 types of equipment will include performance of pre-start inspections, job site evaluation and proper lift operation.

Conducted at your site:

\$750 per class
Includes up to 8 students

Course length: Approximately 3 hours + hands-on evaluation

Prefer Aerial Train-The-Trainer?

In addition to the coverage of operator procedures, your trainer will review ANSI standards, classroom preparation and procedures for performing a hands-on evaluation.

Conducted at your site:

\$950 first student, \$300 each additional student
Includes trainer presentation and binder

Course length: Approximately 8 hours
